

Q

My dvd arrived in the mail with the TVP software. What do I now ?

A

The Best thing to do is to read the [\*\*\*TVPaint User Manual\*\*\*](#) is there for a reason.  
You can download the entire TVPAINT USER MANUAL from

<http://www.tvpaint.com/v2/content/article/downloads/manual.php>

<http://static.tvpaint.com/downloads/manual/tvpa10/manual.pdf>

and print out a copy on paper if that makes it easier for you.  
( some students complain about not getting a paper copy of the manual... but the digital copy can easily be downloaded and printed by you)

Make a good faith effort to troubleshoot and find the answer on your own in The user manual

Check out the [\*\*TVPaint Tutorials Page\*\*](#) on the TVPaint.com website  
<http://www.tvpaint.com/v2/content/article/support/tutorial.php>

for some basic tutorials on the interface. (some of the tutorials show the TVPaint 9 interface, but other than some *cosmetic changes* most of the functions remain the same in TVPaint 10 , so these [\*\*TVPaint 9 tutorials\*\*](#) are still valid .)

Finally, be sure to register (FREE) on the [\*\*TVPaint User Community Forums\*\*](#) .  
<http://forum.tvpaint.com/>

You may post questions about using TVPaint there . The TVPaint user community is very active and helpful . There is a specific sub-forum for [\*\*Technical Support\*\*](#) issues.
